EXPERIENCE

React/Typescript Intern

May 2022 - August 2022

IQM Corporation

- Wrote modern, performant code for all of the company's main projects.
- Worked with technologies like TypeScript, React, Sass, and Jenkins.
- Learned how to effectively work in an agile team using Git, JIRA, BitBucket, & Confluence.
- Developed new features and performed numerous bug fixes that improved clients' user experience.
- Worked on a complete overhaul of the main website, which allowed the company to generate more clients.

EDUCATION

Computer Science, B.S.

Arizona State University

Current GPA: 3.83

Aug 2020 - May 2024

Course Work: Data Structures & Algorithms, Theoretical Computer Science, Discrete Math, Linear Algebra

PERSONAL PROJECTS

Pizza Shop

<https://pizza-shop-team19.herokuapp.com>

Node.js Express MongoDB Cypress
JSON Web Tokens

An ordering system for a fake pizza restaurant. Student customers can make & track the status of orders. Employees of the restaurant can process the orders. Server built with Express, auth with JWT, and end-to-end testing performed with Cypress.

The Burger Center

<https://likhity.github.io/webdev/the-burger-center/>

CSS React Animation

A landing page for a fake restaurant. A showcase of my skill with CSS, design, and animation.

ASU Course Tracker

<https://github.com/likhity/asu-course-tracker>

Node.js Express MongoDB Twilio
MVC Architecture JSON Web Tokens

Tracks the number of seats available for a course at ASU (Arizona State University) and sends a text message to a student user whenever the number of seats for a course changes. Auth using JWT. Twilio for sending texts.

Personal Website

<https://vyas.app>

Next.js Sass

A portfolio website all about me and my projects. Another showcase of my skill in CSS and Design.
